

“Here For The Long Run”

Stalco Gutter Profiles

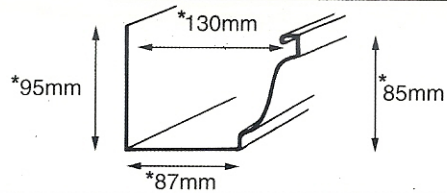

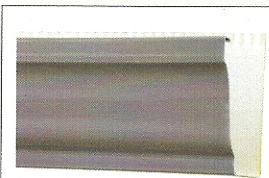

115 Traditional Quad Gutter - Steel

Traditional Quad Gutter is the ideal budget gutter system, where you want to retain the classic appearance of the roof line, characterised by the original 115mm NSW quad. This gutter is designed to install on either a fascia board or exposed rafter ends using powder coated external or mill finish internal brackets.

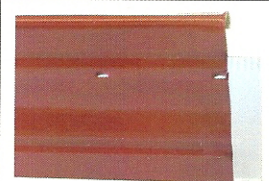

125 Hi Front Quad Gutter - Steel

125 Hi Front Quad is a gutter system with a modern look for today's contemporary building styles. Adaptable to both metal and timber fascia boards this versatile premium gutter, retains the metal thickness and quality foregone in other modern style gutters. Its strong formed profile is both pleasing to the eye and better able to retain its shape when a ladder is placed against it.

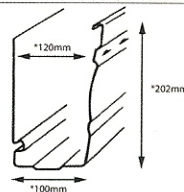

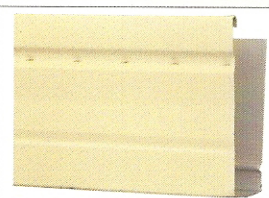

Hi Back Ogee Gutter - Aluminium

Hi Back Ogee gutter will give your home that colonial look popular with heritage style buildings. Different in appearance from traditional gutters with its inverted curved features and slim sharp lines, it is ideal for gutter replacements where you require a different look. Available in our long life aluminium which provides real value for just a little more.

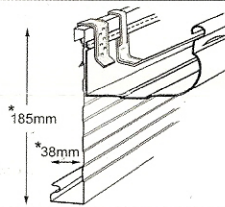

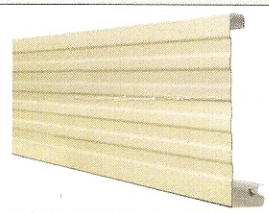

Flowmore Gutter - Aluminium

Flowmore is a large capacity, high flow gutter system that is both stylish and functional for large roof areas and long runs to down pipes. In strong high tensile aluminium, it is a durable choice for large homes, duplexes and housing units, with easy installation features due to its light weight. It is the ideal choice on two story homes and multistory buildings where regular maintenance is difficult.

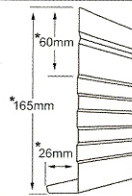

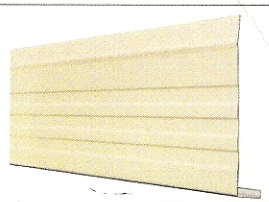

Fascia Gutter - Aluminium

Fascia Gutter is a deep gutter system that provides both an attractive fascia and functional gutter in one. In a strong high tensile aluminium, it can be extruded in very long lengths (continuous).

Structural Metal Fascia System

Designed with quality in mind Stalco metal fascia board provides a modern stylish fascia to your home. It is made of 0.55mm thick Aluminium/Zinc coated steel that makes it strong and rigid compared to our competitors thinner products. Its rafter bracket locking system makes it the premium choice for the construction industry, renovators and owner builders.

Timber Fascia Cover - Steel

Fascia cover revitalises the appearance of old timber fascia boards with the same quality pre-painted finish as your guttering, saving you time and the costs of repainting.

Note :Comes in 4 metres lengths only
